

Shipping and Receiving Overview

The GearSpace 34 ships factory assembled via Freight Truck on a custom-built pallet. Allow approximately 20 minutes to unpack, hitch up and go!

Due to the large pallet size (72”L x 40”W x 46”H), special equipments are necessary to remove the pallet from the freight truck.

For commercial business deliveries that do not have off load capability (a forklift or loading dock), Let's Go Aero can arrange for a liftgate on the freight truck for a liftgate service fee.

Residential deliveries include an advance phone call to arrange a window of time for delivery, and liftgate equipment on the freight truck for a residential delivery services fee.

Delivery services (residential and/or liftgate) must be confirmed when ordering product. All delivery locations must be freight truck accessible.

Liftgate equipment service is curb side only. It is the consignee's responsibility to move the product after it has been lowered to the ground.

Industry Standard Receiving Requirements

Consignee must be present at delivery to inspect all packages and sign for delivery. Any visible alteration to packaging or damage, or shortages **MUST** be noted on the delivery receipt at time of delivery. Notify the carrier and Let's Go Aero immediately and we will assist you as fully as we can. Please retain a signed copy of the bill of lading for your records.

Crated Dimensions: 72”L x 40”W x 46”H
Crated Ship Weight: 200 lbs.
